ENVIRONMENTAL MANAGEMENT SYSTEM -
ENVIRONMENT AND SUSTAINABILITY POLICY

Academy Consulting ('Academy') is committed to the minimisation of adverse environmental impact resulting from its activities.

Academy has identified its Significant Environmental Impacts as follows:

- i) Business and commuting travel (fuel use and pollution effects)
- ii) Use of electricity, gas and water in the office environment
- iii) Procurement and use of office sundries and equipment
- iv) Paper use

We also recognise the importance of sustainability issues in the wider economy and will work with clients, colleagues and team members to promote the completion of cost effective and competitive projects in a sustainable and environment-friendly manner.

We will comply with all applicable environmental legislation and other environment requirements relating to specific projects.

Academy's aim is a continual improvement of environmental performance, and our commitment to achieving this aim will be demonstrated through effective governance and continuing advancement of the following measures:

- Measuring, monitoring and mitigation of the actual and potential environmental impacts of all the company's activities
- Risk identification and management and contingency planning for foreseeable environmental incidents and emergencies
- Minimisation of energy consumption through improvements in energy efficiency and the use of renewable energy sources wherever possible
- Waste minimisation, re-use and recycling and monitoring of waste transfer arrangements to ensure safe disposal, in accordance with the Waste Hierarchy
- Development of environment-friendly travel plans, encompassing both commuting and business travel, with the aim of contributing to a reduction in traffic congestion and pollution
- The encouragement of suppliers of goods and services in the use of best environmental practice and sustainable sourcing
- The promotion of a culture of environmental awareness across the company
- Training of staff in order to improve technical knowledge and awareness of sustainability
- The embedding of sustainability within the company's core services to support clients seeking sustainable building solutions
- Improvement of the sustainability of our clients' projects by working to provide innovative solutions

The person with overall responsibility for our Environment and Sustainability Policy is:

Name: Michael Bull

Position: Managing Director
